PROFESSIONAL SUMMARY

Full Stack Engineer specializing in enterprise and banking applications built with Java, Spring Boot, Angular and TypeScript. Experience in legacy modernization, REST and SOAP integrations, CI/CD and cloud application delivery. Additional experience developing generative AI tools.

TECHNICAL SKILLS

Backend & APIs: Java, Spring Boot, Java EE, REST APIs, SOAP
Frontend: Angular, TypeScript, JavaScript, HTML, CSS, RxJS, Bootstrap
Delivery & Cloud: Git, CI/CD, Jenkins, SonarQube, Docker, AWS, Kubernetes, IBM WebSphere Application Server
Ways of Working: Scrum

PROFESSIONAL EXPERIENCE

Full Stack Engineer | Tata Consultancy Services (TCS) Nov 2023 - Present

Selected client assignments: Bancolombia S.A., Banistmo S.A.

- Develop full stack enterprise banking applications using Java, Spring Boot, Angular and TypeScript across TCS client assignments.
- Contributed to the migration of a legacy banking system from VB6 to Java and Spring.
- Contributed to CI/CD and code-quality workflows using SonarQube during the Banistmo assignment.
- Developed generative AI tools using LLMs and retrieval-augmented generation to support team workflows.

Senior Software Development Engineer | SoftwareONE (Intergrupo) Mar 2021 - Nov 2023

- Developed distributed enterprise applications with Java, Spring Boot and REST APIs.
- Consumed SOAP web services for RUES queries in work related to Camara de Comercio de Bogota, using Java EE applications deployed on IBM WebSphere Application Server.
- Implemented CI/CD pipelines with Jenkins, Docker and Kubernetes.
- Implemented cloud application solutions using AWS EC2, S3 and Lambda.
- Collaborated in Agile/Scrum teams delivering enterprise software solutions.

Full Stack Java / Frontend | Personal Soft S.A.S. Aug 2020 - Feb 2021

Selected client assignments: PACTIA

- Full stack development for PACTIA's digital solution, working with Java and Liferay CMS on the platform and HTML, CSS and JavaScript on the frontend.

Java Software Engineer | Extreme Technologies S.A. Mar 2020 - Aug 2020

- Analyzed, designed and developed information systems and GPS fleet tracking platforms (Xtracking) using Java and Angular as core technologies.

Full Stack Engineer | Global Tax Services SAS Jan 2019 - Mar 2020

- Developed full stack applications for tax services using Java, Spring Boot and Angular.

Software Developer | SENA - SENNOVA Feb 2015 - Oct 2018

- Designed software architecture and system requirements using UML modeling, including use cases, class diagrams, and activity diagrams for SENNOVA research projects.
- Developed web applications for applied research and technological innovation using PHP, MySQL, HTML5, CSS3, Bootstrap, and Vanilla JavaScript.

SELECTED PROJECTS

CASE OS | yamicueto.github.io/case-os github.com/YamiCueto/case-os

Engineering workspace integrating Spring Boot, Angular Signals, Model Context Protocol (MCP) and Python RAG workflows to support enterprise software delivery.

EDUCATION

Software Analysis and Development Technologist | SENA 2015
